I. QUESTION:

Ramkali saved Rs 5 in the first week of a year and then increased her weekly savings by Rs 1.75. If in the n th week, her weekly savings become Rs 20.75, find n .

II. SOLUTION:

Parameter	Value	Description
$x(0)$	5	First term of AP
d	1.75	Common difference of AP
$x(n)$	20.75	n^{th} term of AP

TABLE 0
PARAMETER LIST

Fig. 0. Plot of $x(n) = 5 + 1.75n$

$$x(n) = x(0) + (n)(d) \quad (1)$$

$$20.75 = 5 + (n)(1.75) \quad (2)$$

$$\Rightarrow 15.75 = (n)(1.75) \quad (3)$$

$$\Rightarrow n = \frac{15.75}{1.75} \quad (4)$$

$$\Rightarrow n = 9 \quad (5)$$

Hence, n is 9.

$$x(n) = 5 + 1.75(n) \quad (6)$$

The Z-transform of a sequence $x(n)$ is given by:

$$X(z) = \sum_{n=1}^{\infty} (5 + 1.75n)z^{-n} \quad (7)$$

$$X(z) = \sum_{n=1}^{\infty} 5z^{-n} + \sum_{n=1}^{\infty} 1.75nz^{-n} \quad (8)$$

$$X(z) = 5U(z) + 1.75(z)\frac{d}{dz}U(z) \quad (9)$$

$$X(z) = \frac{5z^{-1}}{1 - z^{-1}} + \frac{1.75z^{-1}}{(1 - z^{-1})^2} \quad (10)$$

$$f(n) = \begin{cases} 5 + 1.75n, & \text{if } n \geq 0 \\ 0, & \text{if } n < 0 \end{cases} \quad (11)$$

Given that $n > 0$,

$$X(z) = \sum_{n=1}^{\infty} (5 + 1.75n) \cdot z^{-n} \quad (12)$$

$$ROC : |z| > 1$$
